

Welcome to the China Baltic Sea Business Forum - the meeting place for the Baltic region and China

If you are looking for new markets, suppliers, partners, capital or innovation in China and the Baltic region, then the China Baltic Sea Business Forum 2009 is the meeting place for you. The forum consists of match-making, a business fair, and seminars on trade and new opportunities in the Baltic region and in China. The forum is attended by representatives from companies in every field, agents, consultants, and various organisations interested in trade between the Baltic region and China.

The forum will provide you with insights and contacts, enabling you to take advantage of the opportunities that are continually opening up in the Baltic region and in China. We have a strong network in China, and are able to find companies in most fields very quickly. Irrespective of the financial situation, growth and the development of purchasing power are still strong in China. Growth rate remains high and forecasts indicate a considerably swifter recovery than in the west.

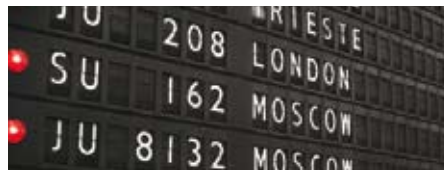

The China Baltic Sea Business Forum will be held 17-18 September 2009 in Kalmar.

You can find out more at www.cbbf.se

Some comments made by delegates from the China Baltic Sea Business Forum 2008:

Dina Alenina
Latvijas Balzams, Latvia

"The flexibility and ability to address needs of participants and offer independent solutions within time restrictions particularly impressed me. It felt so great to have everything highly organized."

Wang Ning, Longray Consulting, China

"CBBF is a remarkable event and I have participated in the event twice. It gives us, the Chinese investors a great opportunity to reach the Baltic Sea region and to get to know the business possibilities there. That is what we really need."

Ingemar Petterson,
Machine Center in Bockara, Sweden

"I attended the forum so I could gain contacts within China in order to start importing, but the opposite happened - we gained contacts within China and have now started exporting. It's incredible!"
